Summary

Full-Stack Engineer specializing in Ruby on Rails, React, and Next.js with 3+ years of work experience building scalable web and mobile applications. I am committed to delivering intuitive user experiences and innovative solutions that align with clients' goals and address users' needs.

Work Experience

Benchmark Digital Solutions, Abu Dhabi, UAE — *Full stack Engineer (Remote)*

Jan 2023 - April 2025

- Engineered scalable backend systems utilizing Ruby on Rails and PostgreSQL, decreasing API response times by 60% through optimized Rails ORM queries, enhancing user experience and system efficiency.
- Implemented a centralized task management system in ClickUp, integrating sprint planning and progress tracking, which decreased code review cycles by 20% and improved version control.
- Synchronized API enhancements with UI/UX improvements via bi-weekly meetings and detailed Figma mockups, leading to frontend teams reporting the lowest bug counts of the year.
- Developed high-performance UIs with React, TypeScript, and Tailwind CSS, achieving 35% faster load times via React Query caching.
- Translated Figma designs into responsive components, enhancing mobile traffic. Used Framer Motion to boost engagement.
- Migrated projects from Expo to React Native CLI, restructuring Podfile/Gradle configurations to resolve dependency conflicts and cut iOS build.

React.js | Next.js | React Native | TypeScript | JavaScript | Tailwind CSS | SASS | Zod | Ruby on Rails

GreenieWeb, Singapore — *frontend developer (Remote)*

Jun 2022 - Jan 2023

- Modernized GreenieWeb's official website using React.js, SASS, and RESTful APIs, achieving 40% increased mobile traffic, and 25% higher user engagement via responsive design and Git CI/CD pipelines.
- Developed a carbon-tracking Chrome extension with JavaScript and Chrome Extension APIs, achieving 90% accuracy in emissions calculations and reducing digital carbon footprints using Webpack and Jest testing.
- Led and managed developers' tasks via ClickUp/Jira, accelerating project delivery and code quality while deploying cross-platform solutions (Electron.js) that exceeded requirements, directly boosting environmental sustainability efforts.

Projects

- **Serdab:** Mobile app as a group/event management system - *Benchmark Digital Solutions - Apr 2024 - present*
React.js | React Native | TypeScript | JavaScript | Tailwind CSS | SASS | Zod | Ruby on Rails
[In Progress](#)
- **Tawafeeq:** Web app for specialized matrimonial - *Benchmark Digital Solutions - Apr 2023 - present.*
React.js | Next.js | TypeScript | JavaScript | Tailwind CSS | Zod | Ruby on Rails
[Live](#)
- **Find My Truck:** Web application as a truck management system - *Benchmark Digital Solutions - Apr 2023 - present.*
[Live](#)
React.js | Next.js | TypeScript | JavaScript | Tailwind CSS | Zod | Ruby on Rails
- **GreenieWeb:** Environmental Service app - *GreenieWeb (Former Project Flux) - Jun 2022 - Jan 2023*
React.js | JavaScript | CSS3 | HTML5 | Node.js
- **GreenieWeb site:** Official website of GreenieWeb - *GreenieWeb (Former Project Flux) - Jun 2022 - Jan 2023*
[Live](#)
React.js | JavaScript | CSS3 | HTML5 | Node.js
- **Zeon Platform:** Official personal branding and course marketing website.
[Live](#)
- **Restaurant App:** Personal website for food Ordering and management.
[Live](#)
React.js | JavaScript | SASS | Node.js
- **Plant shop App:** Personal website, an E-commerce Platform.
[Live](#)
React.js | JavaScript | SASS | Node.js

Technical Skills:

- **Programming languages:** Advanced in Ruby, JavaScript, TypeScript. Strong familiarity with Java and Python
- **Frameworks and Libraries:** Advanced in Ruby on Rails, Next.js, React.js, React Native, and Tailwind. Familiar with Django.
- **Tools:** Advanced in Rspec, Git, GitHub, GitK, Git Cola, PostgreSQL, Clickup, Jira. Familiar with MySQL, Docker, and AWS.

Education:

- **University of the People:** Bachelor of Computer Science - USA (*Remote*)
- **Jain (deemed to be university):** Bachelor of Computer Application (BCA) and Cloud Engineer, Bangalore, India — *on campus (2020 - 2021)*
- **Algorithms analysis and design from scratch:** By Cloud Native Basecamp.
- **Data Structure Decode:** By *Cloud Native Basecamp*.
- **RubyonRails 4 Essential I Training, Git Essential Training, Ruby Essential Training:** By *Kevin Skoglund - Udemy*.
