

ALI ALAKBAR BANIMANSOR

Product Engineer | React, TypeScript & Full-Stack SaaS

Basra, Iraq | UTC+3 | 2ali.alakbar5@gmail.com | GitHub | LinkedIn

PROFESSIONAL SUMMARY

Product-focused full-stack engineer with 4+ years of production experience building responsive SaaS, CMS, web, and mobile-connected products. Strong in React, TypeScript, Next.js, Ruby on Rails, PostgreSQL, REST APIs, scalable application boundaries, and performance optimization. Own features from data modeling and backend logic through polished UI, testing, review, and deployment. Experienced in distributed teams and asynchronous delivery, using AI coding tools to accelerate implementation while validating output through tests and production checks.

CORE SKILLS

Product and frontend: React, TypeScript, Next.js, CSS/SASS, Tailwind CSS, Chakra UI, React Query

Backend and data: Ruby on Rails, PostgreSQL, SQL, REST APIs, ActiveRecord, Sidekiq, multi-tenant architecture

Quality and delivery: Git/GitHub, code reviews, RSpec, FactoryBot, Jest, CI/CD, Docker, AI-assisted development

PROFESSIONAL EXPERIENCE

Full-Stack Engineer | Benchmark Digital Solutions

Jan 2023 - Present

Remote - Abu Dhabi, UAE

- Own production features across Rails APIs, React/Next.js interfaces, PostgreSQL data models, authentication, payments, CMS/admin workflows, and mobile-connected functionality.
- Improved React/Next.js data-loading performance by about 35% using React Query, caching, and targeted rendering optimizations.
- Reduced Rails API response times by about 60% through ActiveRecord query optimization, eager loading, and N+1 elimination.
- Design multi-tenant architecture with tenant isolation, RBAC, module entitlements, audit history, and clear backend/frontend authorization boundaries.
- Use AI coding tools after defining architecture and design patterns to accelerate implementation, then validate changes through testing, review, debugging, and production checks.

Frontend Developer | GreenieWeb

Jun 2022 - Jan 2023

Remote - Singapore

- Modernized a responsive React/SASS website and built a carbon-tracking Chrome extension with JavaScript, Webpack, and Jest.
- Worked in a distributed team using ClickUp and Jira, contributing code reviews, shared standards, and cross-browser reliability improvements.

SELECTED PRODUCT WORK

Benchmark Connect | Rails 7.1, Next.js, React/TypeScript, PostgreSQL

- Build a multi-tenant SaaS product with CMS/admin workflows, collaboration and chat, task management, notifications, customer dashboards, and separate admin/employee experiences.

Find My Truck | Rails, Next.js, React/TypeScript, PostgreSQL

- Delivered multi-role owner/customer/admin workflows, versioned REST APIs, secure authorization, payment integrations, multilingual routing, and performance-focused dashboards.

Serdab | Rails API, React Native, React/TypeScript, Sidekiq, RSpec

- Developed consistent web/mobile workflows, dynamic permissions, group and event features, OTP/session flows, localized notifications, and tested APIs.

EDUCATION AND LANGUAGES

Education: Computer Science coursework - University of the People (2021-2022); Computer Applications and Cloud Engineering coursework - Jain University (2020-2021).

Languages: Arabic - Native | English - C1 (Professional) | German - B2 (Upper-Intermediate)
