

Ali Akbar Ahmed

Full-Stack Web Engineer – Next.js, React, Ruby on Rails

Location: Basra, Iraq (Open to relocation – Saudi Arabia, UAE, Germany)

Email: ali.akbar@myakbar.com

Portfolio: <https://myAkbar.com>

GitHub: <https://github.com/ali-alakbar>

LinkedIn: <https://www.linkedin.com/in/ali-almansoori-6a6570185>

Professional Summary

Full-stack engineer with 3+ years of experience building production web and mobile applications using Ruby on Rails, React, Next.js, and TypeScript. Strong track record delivering high-performance UIs, optimized APIs, and scalable architectures for clients in the UAE, Singapore, and remote teams. Comfortable working across the full stack—from database design and API implementation to frontend performance and UX polish.

Open to on-site or hybrid roles in Saudi Arabia, UAE, or Europe (Germany) and experienced collaborating with distributed teams across time zones.

Core Skills

Frontend: React, Next.js, React Native, TypeScript, JavaScript (ES6+), Tailwind CSS, SASS/SCSS, HTML5, CSS3, Framer Motion

Backend: Ruby, Ruby on Rails, REST APIs, authentication & authorization, background jobs

Databases: PostgreSQL, MySQL

Testing & Quality: RSpec, Jest, React Testing Library

Tooling & DevOps: Git, GitHub, CI/CD basics, Webpack, Chrome Extension APIs, ClickUp, Jira

Practices: Agile/Scrum, code reviews, performance optimization, responsive design, accessibility

Professional Experience

Full-Stack Engineer – Benchmark Digital Solutions (Remote – Abu Dhabi, UAE)

Jan 2023 – Apr 2025

Engineered scalable Rails backends with PostgreSQL, reducing API response times by ~60% through optimized queries and N+1 query elimination, improving overall system responsiveness.

Built high-performance frontends with React, Next.js, TypeScript, and Tailwind CSS, leveraging React Query and caching to achieve ~35% faster page load times and smoother data fetching.

Collaborated closely with designers using Figma; translated designs into pixel-perfect, responsive components and used Framer Motion for micro-interactions that improved user engagement.

Implemented a centralized task management workflow in ClickUp, integrating sprints and code review steps, which reduced review cycle time by ~20% and improved coordination across frontend and backend teams.

Participated in regular product/tech syncs to align API design, UX, and business requirements, contributing to one of the lowest bug rates recorded on key projects during peak release cycles.

Supported mobile initiatives by assisting in migration from Expo to React Native CLI, restructuring iOS/Android build configurations and resolving dependency conflicts to

stabilize mobile builds.

Key technologies: React, Next.js, React Native, TypeScript, JavaScript, Tailwind CSS, SASS, Zod, Ruby on Rails, PostgreSQL, ClickUp, Jira

Frontend Developer – GreenieWeb (ClimateTech) (Remote – Singapore)

Jun 2022 – Jan 2023

Modernized the GreenieWeb official website with React and SASS, delivering a fully responsive redesign that contributed to ~40% increase in mobile traffic and ~25% higher user engagement.

Built a carbon-tracking Chrome extension using JavaScript and Chrome Extension APIs, achieving around 90% accuracy in digital emissions calculations and helping users understand and reduce their digital carbon footprint.

Implemented bundling and optimization via Webpack and added Jest tests, improving performance and reliability for users across multiple browsers.

Coordinated tasks for a small distributed frontend team using ClickUp/Jira, helping keep features on schedule and maintaining code quality through code reviews and shared standards.

Key technologies: React, JavaScript, HTML5, CSS3, SASS, Node.js, Chrome Extension APIs, Webpack, Jest, ClickUp, Jira

Selected Projects

Find My Truck – Trucks Management System – Benchmark Digital Solutions

Multi-role (owner, customer, admin) platform for managing trucks, bookings, and payments.

Built using Ruby on Rails (API) + Next.js/React frontends with TypeScript and Tailwind CSS.

Implemented secure authentication, role-based access, and performance-optimized data loading for dashboards.

Tawafeeq – Specialized Matrimonial Platform – Benchmark Digital Solutions

Next.js + Rails based platform for specialized matrimonial matching and event workflows.

Responsible for building responsive dashboards, form flows, and integrating with backend APIs.

Used TypeScript, Tailwind CSS, and Zod for type-safe form validation and better developer experience.

Serdab – Group & Event Management System – Benchmark Digital Solutions

Contributed to a React Native mobile app and React web interface for managing groups, events, and members.

Integrated with a Ruby on Rails backend, focusing on API consumption, state management, and UI performance.

GreenieWeb – ClimateTech Chrome Extension – GreenieWeb

Built UI for a carbon-tracking Chrome extension using vanilla JS, React, Webpack, and SASS.

Implemented data visualization and user flows that help users understand their carbon footprint.

Zeon Platform – Personal Branding & Courses (Personal Project)

React + SCSS, Framer Motion animations, React Router, and SEO-friendly structure.

Restaurant App – Food Ordering SPA (Personal Project)

React, SASS, React Router, Google Maps integration, and responsive design.

Plant Shop App – E-commerce Platform (Personal Project)

React, SASS, shopping cart, wishlist, and product catalogue with responsive UI.

Education

Bachelor of Computer Science – University of the People (Remote – USA)

2021 – 2022

Bachelor of Computer Applications (Cloud Engineering) – partial – Jain (Deemed-to-be University), Bangalore, India (On-Campus)

2020 – 2021

Courses & Training

Algorithms Analysis and Design from Scratch – Cloud Native Basecamp

Data Structure Decode – Cloud Native Basecamp

Ruby on Rails 4 Essential Training – Udemy (Kevin Skoglund)

Git Essential Training – Udemy

Ruby Essential Training – Udemy

Languages

Arabic: Native / Fluent

English: Professional working proficiency

German: A2 – Elementary proficiency
